

Xin Chàorma & Co. — Ground Floor Shophouse Interior

Photorealistic Architectural Visualization — AI Image-Edit Prompt

Location: Sunset Town, Phú Quốc, Vietnam

Brand concept: Premium modern halal shawarma fast-casual — *One Bite. Two Cultures.*

Style fusion: Levantine shawarma house × Vietnamese bánh mì bakery × Sunset Town Mediterranean architecture

0. Instruction Type: IMAGE EDIT, NOT NEW SCENE

Use each uploaded reference photo of the empty shophouse as the **exact architectural base**. Do not redesign, move, enlarge, remove, or invent architecture. Keep, unchanged, from every source photo:

- Exact room dimensions, proportions and floor level
- Existing walls, columns, and ceiling height/geometry (including the angled/vaulted ceiling sections and AC bulkheads visible in the source shots)
- Existing doors, glass storefront openings, and window positions
- Existing staircase and glass/metal balustrade
- Exact camera position, viewing angle, perspective and lens characteristics for each shot

The output should read as *a photograph of this same room, after renovation, taken from the same tripod position.* Only change: finishes, furniture, lighting fixtures, counter, equipment, branding, and decor.

1. Design Direction

A sophisticated Mediterranean × Levantine × Vietnamese interior — **not** a generic Middle Eastern restaurant. Premium, contemporary, warm, artistic, highly photogenic.

Palette

- Burnt Tangerine #D64F26
- Warm Sand #E4CDA6
- Deep black (matte, for metal framing and accents)
- Warm off-white / cream plaster
- Natural oak and walnut wood
- Terracotta
- Aged / brushed brass

Materials

- Warm textured lime-plaster walls, cream/warm-white
- Natural oak or walnut wood joinery, tables, and chairs
- Terracotta tile used selectively (behind the bread station, as an accent band)
- Handmade-look ceramic tiles for splashes/backsplash

- Brushed brass trim, rails, and signage letterforms
- Black matte metal framing on glass partitions and shelving
- Stone (light travertine-tone) countertops
- Subtle Arabic geometric pattern motifs worked into tile or screen details — restrained, not literal ornamentation
- Subtle Vietnamese lacquer/rattan textures worked in through pendant shades and stools

Keep it clean and restrained — a few strong material moments, not an overdecorated space.

2. Mood Reference (style anchor, not a literal copy)

Blend the brand palette above with the **lighting and seating language** shown in the attached AWANI reference photos:

- Clustered pendant lighting mixing **woven rattan/seagrass drop shades** with **dark terracotta jug-shaped pendants**, hung at varied heights over the dining floor
- **Navy-upholstered dining chairs** on natural wood legs, mixed with a lighter bouclé/cream chair for variation
- A **wavy-profile black metal screen** used sparingly as a low banquette-back divider between table clusters
- A **textured stacked-stone (or handmade ceramic tile) accent wall** with warm backlit display niches for ceramics/props
- **Banquette seating** with patterned bolster cushions in rust/terracotta/indigo tones against the accent wall
- Warm brass/copper tabletop accessories (pepper grinders, small carafes)

Re-tint and re-material all of this into the Xin Chàorma identity: swap navy/beige for warm sand, burnt tangerine, terracotta and black; swap generic ceramics for Levantine-Vietnamese hybrid pieces (clay jugs, lacquered trays).

3. Food-Theater Counter (main focal feature)

Shawarma station

- One or two vertical shawarma rotisseries, large premium stainless-steel equipment
- Halal beef/chicken cones rotating vertically
- Warm, dramatic focused lighting highlighting the meat (like a spotlight cone)
- Visible staff prep area behind the counter

Bread / bánh mì theater

- Visible artisan bread prep area beside or adjacent to the shawarma station
- Small open bakery / bread oven, warm glow from within
- Fresh Vietnamese bánh mì-style loaves visibly baking or racked
- Subtle nod to Jordanian shrak bread (a domed griddle or flat stone visible in the prep area) worked in as a textural/process detail, not signage

Position the counter so food prep is visually open to the seated dining area — a see-through or partial-height service line, matching where the columns/openings already exist in each source photo.

4. Branding

- Wordmark: **XIN CHÀORMA**
- Tagline: **One Bite. Two Cultures.**
- Rendered as dimensional signage: backlit brass channel letters, painted sign board, or metal-cut lettering — must read as physically fabricated and mounted, not a flat overlay
- Place on one primary feature wall only (e.g., above/behind the shawarma counter, or the accent wall opposite the entry) — do not repeat the logo on every wall
- A secondary small brass or painted mark near the entry door is acceptable

5. Seating & Layout

Mix, sized to the actual footprint visible in each shot (target ~20–30 seats total across the floor):

- Compact 2-top tables
- Small 4-top tables
- Built-in banquette seating along a long wall where architecture allows
- Natural wood dining chairs, black metal detailing on a subset
- Efficient fast-casual spacing — energetic, not crowded; keep clear circulation to the counter, entry doors, and staircase

6. Lighting

Warm color temperature, 2700–3000K throughout.

- Warm pendant clusters (per mood reference above) over table groups
- Wall sconces on the accent/feature wall
- Under-counter lighting at the service counter
- Focused accent lighting on the shawarma rotisserie
- Subtle lighting on the brand signage
- Soft architectural cove/uplighting following the existing ceiling geometry

Render realistic shadows, reflections on the stone floor and stainless steel, and a beautiful evening atmosphere that still reads bright enough for service.

7. Photography Requirements

- Ultra-photorealistic architectural visualization, professional restaurant/interior photography quality
- Physically accurate lighting, realistic reflections and shadows
- Realistic wood grain, plaster texture, stone texture, brushed/polished stainless steel

- No CGI-looking surfaces, no exaggerated wide-angle distortion, no fantasy architecture
- Maintain the exact original camera viewpoint, framing, and lens perspective of each source photo

8. Per-Shot Camera Notes

Apply the full brief above consistently to each of the following source angles, preserving each one's specific geometry:

- 1 **Rear corner, wide diagonal view** — angled ceiling bulkhead and AC unit visible top-center, black skirting along both walls, camera low-ish looking across the full floor toward the rear wall. Place the shawarma rotisserie/counter along the rear wall run.
- 2 **Same rear zone, tighter crop** — near-identical vantage, slightly closer to the corner; use for a close-up read on the counter/equipment detail.
- 3 **View toward the glass storefront** — full-height black-framed glazed double doors at the far end, daylight streaming in, staircase and stairwell opening visible at left. Keep the entry doors as the storefront glass; seating fills the mid-ground.
- 4 **View toward the staircase** — glass-and-metal stair balustrade visible upper right, open sightline down the long room. Good angle for showing the bread/bakery station near the stair core and general dining spread.
- 5 **Window/garden-facing wall** — tall multi-pane windows and a garden-facing door on the right, daylight and greenery visible outside. Good angle for banquette seating with the accent wall and pendant cluster, using the natural daylight as the key light source instead of warm evening lighting.

Prepared for Xin Chàorma & Co. — halal shawarma, Levantine soul, Vietnamese street-food influence, Sunset Town Mediterranean setting.
